Currency of Russia.

It is well known that the currency of Russia consists almost exclusively of paper. Travellers complain of the variety of colored notes which there represent money, and of their ragged and dirty appearance. We are also beginning to know something of the unpleasantness of carrying such symbols about us, since the disappearance of silver small change from circulation. We hear nothing of its being exported in large quantities abroad like gold, unless we take into account the dollars and half dollars which have found their way into the Canadas, and we imagine that it exists among us in shape of hoards not to be seen again in broad day light, till our paper money is again convertible into gold on demand.

Russian finance has at this moment something of the character of our own, and therefore is worthy of notice by all those who are interested in our national finance.

On examining our foreign files we perceive that

an article which lately appeared in the Revue des deux Mondes, on this subject, created great uneasiness at St. Petersburg, and led to an animated discussion in the leading Russian journals. The motive of the author of the article was charged to have been a malicious one, and among those who have appeared in the conflict to defend the Russian system is M. Raffalovich, a rich banker of Odessa, who to great possessions adds a large experience in business, and a thorough knowledge of the resources of his Country. It is to his views we propose to give our attention, as far as we are able to comprehend them from the translation of his memoir as it appears in the English journals.

Like all other Bankers he is opposed to the issuing of paper money by any but by banking institutions, and yet he considers that the paper currency of Russia is not excessive, not being in all but six hundred and thirty five millions of roubles (the rouble at 75 cts.) while that of England is one thousand millions of francs (20 cents each) that of France something less, so that of Russia is really but a very little greater. Mr. Raffalovich maintains the necessity of this large circulation, from the fact that there is no such system of rapid intercommunication in Russia as exists in France and England, that the distances between commercial centres are enormous, and there is a great lack of a good system of banking. Russia contains seventy millions of people, and to traverse the Empire between its commercial bounds, requires fifty and sixty days. On the contrary, in France and England a man may almost pass from one end to the other in a couple of days and nights. Payments of money in Russia are always made in bank notes, and not in checks or drafts, and these are kept in the pocket ready to be used. Money orders are unknown, the monies received by the Government for taxes are not immediately disbursed, but remain for some time in the districts where they are collected, before they reach the treasury.

It is therefore contended that an immense from circulation, and that the real quantity passing from hand to hand is but little more than one third of the whole issue.

One of the most curious points discussed by the

eased accommodation which the trade of the have been renewed, as against 641 miles in the General Mectings at which the Acci

writer is the effect of paper money on exchange. The article in the Revue maintains that the quantity of paper money affoat in a country acts injuriously in its exchange. The Russian banker maintains the opposite, and asserts that exchange depends upon the exportation of products. Thus he says in 1856 and 1857 when the paper currency of Russia was greater than it is now, and could not he exchanged for gold, exchange on Paris was favorable to the Russian bourse, and that it was entirely caused by the increased exportation of Russian products. He asserts that the flow of Russian capital to other markets, in consequence of the reduction of the interest in Bank deposits at home, the increase of imports over exports, caused partly by the reduction of the tariff, and the drain of funds to supply the wants of travellers, who are permitted to go abroad with greater freedom than formerly, are the real causes of the unfavorable condition of Russian exchanges at the present moment.

These conditions of Russian finance somewhat resemble our own. We see paper money in quantities unknown before in this Country, and our imports exceeding our exports every week, by a very large difference.

These imports, many of them purely articles of luxury and fashion, find ready purchasers at any price, because paper money is so plentiful, and though it has to be reduced to gold to pay the cost of the imports abroad, there is margin enough left for a large profit to the importers. The business thus transacted is however very much like passing a coal of fire from hand to hand, each one pushing it to his neighbor as quickly as possible, and so rapid is the movement, that no one holds it long enough to burn himself. If by any change our exports were equal to our imports, there would be no balance in gold to be remitted. This simple proposition can not be disputed. How far it would be wise to attempt by legislation to bring about the equalization, remains for consideration. Doubling the duties on all articles of luxury, has been suggested. The effect of this would be to amount of paper money is constantly withheld leave the revenue very much as it is. If half our imports were cut off, and the duties on the remainder doubled, the revenue would be the same. Those persons only who are getting rich, or have become rich in paper would be able or willing to and of principles in a province have been principled

purchase wines at five or ten dollars a bottle, or Smyrna grapes at one dollar a pound. Easy come involved great hardship upon the late creditors of line relaid in the year 1863 has been 1254 miles, or and lightly go is the motto of the suddenly made rich, but as political economists, we have but little sympathy for their imaginary wants.

It is the hard working, industrious, saving, prudent people who really accumulate the true wealth of the nation, who fill its reservoirs, and keep them full, and not those who with the fury of a suddenly swollen mountain torrent, come rushing over the old land marks of business, sweep on with resistless power, and suddenly disappear from view, leaving wrecks and ruins behind them where they have passed. We are certainly at a very critical moment in our financial affairs, having as we believe issued as much paper for circulation as the Country can bear. Russia congratulates herself on her great and inexhaustible resources, and so may we with even greater cause, for the mines of Russia are surpassed by ours. Our internal transportation, natural and artificial is perfect, our soil is superior, and above all, our enterprise is unchecked, and seizing opportunity generally comes off victorious.

#### Grand Trunk Railway of Canada.

REPORT OF THE DIRECTORS.

For the half-year ending 31st December, 1863.
Earnings of the half-year£477,839
Deduct ordinary working expenses 275,073

Net balance over ordinary working ex-to revenue in the half-year ......

The gross receipts from traffic and all other sources for the half-year have been £477,839, as against £439,361 for the corresponding half of 1862, or an increase of £38,478, or 8.76 per cent. This increase has been obtained in the face of unusually low rates for freight throughout the fall and winter, caused by depressed prices of produce, and by the navigation of the St. Lawrence and the lakes having been kept open, owing to the mildness of the early winter season, until the the mildness of the early winter season, until the close of the year. Thus the winter rates, fixed at a higher scale when the navigation is closed, could not be put into operation as heretofore about the first week in November. The estimates formed of the harvest in 1863 in Canada and the Western States have also not been fully realized. From these causes it will be noticed that while the total tonnage of freight carried during the half year has been 372,984 tons, as compared with \$25,337 tons in 1862, the receipts have only been £282,067, as against £286,273. Thus, the freight of the December half of 1862 yielded an average receipt of 17s. 7d. per ton, while that of 1863 only yielded 15. 1d. per ton.

The passenger receipts, on the other hand, show a very gratifying increase: the number of passengers of all classes carried having been 529,723, as against 453,926 in the last half of 1862, or an increase of 75,797 or 16.69 per cent. The money carned has been £170,484; as against £127,180, or an increase of £43,304, or 34.05 per cent. Thus, while in 1862 the average receipt per passenger was 5s. 7d., that of 1863 has been 6s. 5d. As the company's local passenger charges have been reduced in many cases, it will be seen that this in-crease has been caused by the conveyance of a larger proportion of "through" or long distance

The amount carried into the accounts for "Postal Service" is merely nominal, no settlement having yet been arrived at with the Government of Canada, which is matter of deep regret.

The improvement of the Permanent Way by strenthening and renewal has progressed rapidly. This delay has seriously affected the company's during the half-year. No less than 804 miles of financial position, preventing it from giving that increased accommodation which the trade of the land 4th Preference Stock, whole year on the 2nd Preference Bonds, and for the whole year on the 2nd Preference Bonds, and for the whole year on the 2nd Preference Bonds, and for the whole year on the 2nd Preference Bonds, and for the stock.

The amount carried into the accounts for whole year on the 2nd Preference Bonds, and for the whole year on the 2nd Preference Bonds, and for the whole year on the 2nd Preference Bonds, and for the whole year on the 2nd Preference Bonds, and for the whole year on the 2nd Preference Bonds, and for the whole year on the 2nd Preference Bonds, and for the whole year on the 2nd Preference Bonds, and for the whole year on the 2nd 4th Preference Stock, while year, because of the 2nd 4th Preference Stock, while year, because of the 2nd 4th Preference Stock, while year, because of the 2nd 4th Preference Stock, while year, because of the 2nd 4th Preference Stock, while year, because of the 2nd 4th Preference Stock, while ye The amount carried into the accounts for "Postal Service" is merely nominal, no settlement having yet been arrived at with the Govern-

the company, who gave up claims and securities in order to promote the interests of the undertaking, and in the confident hope of that just and early arrangement, so often promised, hitherto without accomplishment.

The ordinary working expenses show a total outlay of £275,073, as against £262,307 in 1862, or an increase of £12,766, or 4.86 per cent., expended in earning an increase of \$38,478, or 8.76

er cent.

The per centage of ordinary working expenses in 1863 is 57.56 per cent., as against 59.68 per cent. in 1862.

The following statement shows the per centage rate of ordinary working expenses since 1861, in-

June Half Y	ear. Dec. Half Year
186187.32 per ce	ent. 68.64 per cent
1862	59.68 "
1863 63.87	57.56 "

The following statement shows the progress of the net revenue of the company since 1859:—

			TIA POROCO		
Year.			including renewals.		
	No.	£	£	£	£
1859-June			203,062	20,867 } 52,490 {	73,537
1860-June.	978	314,811		46,000 2 56,684	102,684

74,635 15 0 Balance carried forward to next ac-532 3

£132,777

As already announced, the half-year's interest accruing on the First and Second Preference Bonds to the 31st December last, will be paid on and after the 15th April, on the presentation of the coupons at the Company's bankers, and the certificates for the arrears to be capitalized for the first half-year on the 2nd Preference Bonds, and for the

nearly one-eighth of the whole length of the Grand Trunk Railway system. The length laid in 1862 was 8034 miles. The number of new sleepers or ties, laid in, was in 1862, 302,172, and in 1863,

The Board now consider that the time has arrived for distributing the extra charges involved in reconstructing portions of the main line to their proper accounts, and for commencing the proposed "Renewal Account" to be gradually extinguished out of Revenue. Therefore, the sum of £8,622 has been charged to capital for additional weight of iron and for fish plates, and £26,035 has been placed to such "Renewal Account."

Arrangements are in progress for the manufacture, under contract, of steel and steel-headed rails, to be laid down in place of iron rails on the main line; and the information and reports which the Board have received confirm their previous impression of the greatly superior endurance of the proposed new material. The proved results on the London and North Western Line afford most valuable evidence; it has, in fact, been found, as stated by the Chairman of the London and North-Western Company at their recent half-yearly meeting, that the new rails laid down on the busiest portions of their Line have already lasted ten times as long as the ordinary iron rails. Assuming results at all approaching to these

experiences, it may be estimated that a great future economy in cost can be achieved on the Grand Trunk Main Lines, by a comparatively small additional outlay on first cost of Renewal: and it will undoubtedly be so much added to the improved and solid value of the property.

It is proposed for the future to charge direct to Revenue £70,000 a year for Renewals, and to carry the excess outlay in the next two years to the "Renewal Account," and so far as the extra cost of "fishing" and of steel are concerned, to

Capital.

The Company's practical officers report that a regular charge to Revenue of £70,000 per annum, equal to the renewal of 80 miles a year of improved and strengthened road, will in the course of five years overtake and extinguish the Renewal Account established. But it will be observed that such an account involves the provision of so much available Capital to meet the first outlay to be so extinguished,

The outlay on Capital Account for additions to the plant and property of the Company has been £47,182, as against £18,142 for 1862. The former sum includes the cost of 99 new freight cars, two new sleeping cars, and two new engines, being part of the additional plant proposed to be provided in the last Report confirmed by the Bond and Shareholders.

The large and steady increase in the traffic will compel further additions to the means of conveyance, and enlarged station accommodation at vari-

ous points.

The Board are happy to report that the Canadian government have released the £42,500 Second Preference Bonds previously retained, enabling the use of these securities for similar necessary outlay.

As the Equipment Mortgage Bonds authorized by the Arrangements Act of 1862 are to be offered in the first instance to Bond and Shareholders, the Board propose to permit applications for the early issue of a moderate portion of this capital.

An addition to Bond capital for unpaid interest

on Bonds has been made in the accounts, under

the terms of the Arrangements Act, 1862.

The issue of Postal and Military Service Bonds to the Company's creditors now appears in the Capital Account; as also the issue of Fourth Preference stock.

mitted being held in April and October, it will be necessary, with a view to regularity, to obtain powers from the Canadian Parliament to pay the Bond Interest earned subsequent to the approval
of the Accounts by the Bond and Shareholders.
An agreement has been sealed between the
Grand Trunk and Buffalo and Lake Huron Com-

panies for mutual facilities of working and interchange of traffic; and powers will be sought in the present Session of Parliament to confirm the

The Board believe that the results of the past half-year's working, showing as the do a steady in crease of revenue and an important decrease in the per centage of working expenses, will be re-garded as very satisfactory by the Bond and Shareholders. The latest accounts received from Canada speak hopefully of the traffic prospects o the current year, and they at the same time afford many evidences of the improved state of the public opinion in Canada in regard to the under-

The Directors who retire by rotation are Messrs Blake, Cassells, Hodgson and Molson, and the retiring Auditors in Canada are Messrs. Taylor and Morland, and in England, Mr. Newmarch. They are eligible and offer themselves for re-election.

On behalf of the Board. EDWARD W. WATKIN, President.

On the 31st Dec. last, the Company owned 8 passenger, and 147 freight engines; 88 first-class and 45 second-class cars, as also 12 sleeping cars "composite;" 38 Post-office and baggage, 22 bag gage, 1,853 box, 50 box and cattle, 55 cattle, 1,073 platform and 73 ballast cars. The rolling stock further comprised 57 break-vans and 32 snow-ploughs. The total rolling stock, therefore, comprised 228 engines and 3,450 passenger, freight and other cars. In the half year ending on the 31st December, 2,532,184 miles were run against 2, 324,281 miles run in the corresponding period of the previous year. In the last six months of 1863, 58,113 cords of wood were used against 59,-628 in same period of 1862.

#### Negligence of Parties Injured upon Rail- into the street; or his parents might have been Railroad, Verm. 487. Briggs es. Taylor, 28 Verm. roads,-Injuries to an Infant.

In the case of Wright against Malden and Melrose Railroad Company, a jury had rendered a verdict against the company for \$3,000. The defendants appealed from the judgment, on the trial that the plaintiff's intestate, a child, was run over by one of the cars of the defendants, on their horse railroad track in Sudbury street, Boston.

The child was two years old and died in consequence of the injury. One of the grounds upon which the plaintiff claimed that the servant of the defendant was negligent, was, that he was driving at a very rapid rate; to wit, as fast as ten or twelve miles an hour.

The defendant's counsel asked the judge to instruct the jury as follows: 1. That it would be negligence to permit a child of the age of this child to go on a public street unattended. 2. That negligence and imprudence of parents or guardians, in allowing a child of the tender years of this child, to be exposed to injury on a public and frequented street, furnishes the same answer to an action by the administrator of the child for such injury as the negligence or other fault of an adult plaintiff. 3. That if the accident would not have happened, had the parents or guardians taken proper care of the child, and the want of such care on their part had a material effect in producing the injury, or substantially contributed towards it, the plaintiff cannot recover. The judge refused to so charge except in a modified form. The following was the decision on appeal.

HOAR, J .- The instructions of the court to the jury were given with great accuracy, and what it was incumbent upon the plaintiff to prove, and the rule as to the burden of proof, were stated with case and exactness. But upon another part of the case we find greater difficulty. The defendants' counsel asked the court to instruct the Jury, "that it would be negligent to permit a child of the age of this child to go on a public street, unattended."

The presiding Judge did not give this instruction; but said to the Jury substantially as follows: "There is a sense in which I may properly use the language of the request. If the parents, knowing the position of the child and its danger, and the means of preventing the injury, and neglected to use them, and permitting the child to remain in danger, the plaintiff, cannot recover; but I understand the defendants' counsel to desire me to rule that the mere fact that the child was passing across the street unattended, is, in and of itself, necessarily such a want of due care, or such a fault, as to prevent recovery, by the plaintiff. I cannot so rule. It is not necessarily, in and of itself such evidence of fault or neglect, as entitles, the defendants to a verdict."

We fear that this statement of the law by the learned Judge must have given an erroneous im\_ pression to the Jury, as well by what it omitted as by what it directly expressed.

In the sense in which he understood the defendants' request, the instruction asked should certainly not have been given. Cases may undoubtedly be supposed in which the child might have been upon the street, and have been "permitted" to be there unattended, without fault or negligence on the part of his parents, or those having him in charge. The house might have been on fire, and the child might have been put stitute negligence. Trow vs. Vermont Central long be delayed .- Watertown Democrat.

disabled by accident or disease, and the child have | 180, and in several recent cases in this Court it for his own safety and preservation. A person having charge of him in the street might have fallen senseless, or met with some injury, which left the child to stray away unattended. True, there is nothing in the report of the evidence, so far as it is contained in the bill of exceptions, to show that any such state of facts was before the iury; but we cannot presume that all the evidence is reported, and the possibility that such things might occur, is enough to show that the instruction asked was too broad. But the Court proceeded to state the sense in which the instruction might properly be given; and in doing this, gave to the jury a definition of what would constitute negligence in the parents, which seems to us much too limited and defective. The jury might well infer from the language of the Court, that it was only when parents knew the position of the child and its actual dangers, and had the means of preventing the injury and neglected to use them and permitted the child to remain in danger, that they were justly chargeable with neglect. This would lead their minds wholly from the consideration, whether the parents had used reasonable and proper care to prevent the infant from going into the street at all; a question of scarcely less importance, and which may have deserved serious attention. The prayer for instructions rendered it highly proper that some ruling should be given as to what would constitute negligence in the parents, sufficient to deteat the action; and the statement made did not cover the whole field of inquiry, and might mislead the jury. But the direction which followed went further. The jury were told that the mere fact that the child was passing across the street unattended was not necessarily in and of itself, such evidence of fault or neglect as entitled the defendant to a verdict. In this opinion we cannot concur. We think the fact, that a child of two years in passing unattended across a public street in a city traversed by a horse railroad is, "in and of itself necessarily," prima facie evidence of neglect in those who have it in charge. It is a fact open to explanation, and not conclusive. But in and of itself, standing alone, unexplained and unaccounted for, it is sufficient to authorize a jury to find that the child was not properly taken care of, and to entitle the defendants to a verdict.

The jury were rightly instructed that the burden of proof was on the plaintiff, to show that a want of care on the part of his parents did not contribute to produce the injury. We cannot regard evidence that he was in the street unattended, and was run over by the cars, as having any tendency to show that proper care of him was exercised, but the contrary. He was incapable of taking care of himself, and he was entitled to the care of others; and this does not show that he received it. There is nothing in the mere fact of his dangerous situation to show that it was necessary or proper, or occasioned by anything else than neglect.

It has been decided by the Supreme Court of Vermont that the question of negligence is a mixed question of law and fact; and that it is the duty of a judge to instruct the jury what will con-

been sent into the street, as the best alternative has been held, that where a plaintiff who seeks to recover compensation for an injury occasioned by the carelessness of another offers no evidence that he was himself in the exercise of care, but on the contrary, the whole evidence on which his case rests shows that he was careless, the Court may rightfully instruct the jury as a matter of law, that the action cannot be maintained.

Exceptions sustained.

#### Railroad from Buffalo to Salamanca.

A railroad convention was held on the 11th ult., at Yorkshire, N. Y., for the purpose of considering the propriety of using all reasonable means to forward the construction of a railroad through the Valley of Great Valley Creek, from the city of Buffalo to same point near Great Valley in the county of Cattaragus. On motion, a committee was appointed to submit to the Convention a plan whereby the towns affected by the proposed railroad from Buffalo to Salamanca may best exert their influence to the furtherance of the object. Whereupon the following preamble and resolutions were submitted and unanimously adopted:

Whereas, It is for the benefit of the towns represented in the Convention, that a railroad be constructed between Buffalo and Salamanca through the Valley of the Great Valley Creek; and

Whereas, The towns interested should do everything in their power to aid and assist such an enterprise by donating the right of way, &c., there-

Resolved. That a committee of three from each town be appointed to secure the right of way through said towns, and perfect plans to pay for said right of way in such manner as they may think proper, after consultation with their fellowcitizens. Such town committee to act only within the limits of their own towns.

Resolved, That a committee of four be appointed

to ascertain the ownership of, and if necessary to procure the franchises of the Buffalo and Pitts-burgh and the Buffalo and Alleghany Valley Railroads, and hold them for the benefit of the first company, or any company that will construct a rail-road from Buffalo to Salamanca through the valley of the Great Valley Creek.

Under the first resolution, committees were appointed from the towns of Aurora, Holland, Wales Sardinia, Yorkshire, Machais, Ellicottville, and Great Valley.

Under the second resolution, the following gentleman were appointed, viz: Aaron Riley, Aurora; Eleazer Harmon, Ellicottville; L. D. Cobb, Yorkshire, and A. G. Rice, of Ellicottville.

The representatives from the several towns along the line gave assurances that the right of way will be given to any company who will construct the road.

#### Milwaukee and St. Paul Railroad.

The Milwaukee and St. Paul Railroad Company, have now a considerable number of men at work on that part of the Watertown Division be-tween the Mississippi Junction and Milwaukee. The intention is to have this short section completed and in running order as early as July. We notice the contractors have circulated handbills, calling for more laborers, and offering good wages.

Work is still progressing on the section between Columbus and Portage City, a great portion of the grading having been completed. We presume the next move will be to build the short section between Sun Prairie and Madison, the immediate construction of which would be a great public convenience. We can now hope that it will not

is so intimate and strong, that they feel able to obtain on their own names all the additional amounts necessary to control the market.

How true this is we are not able to say; but of this we are sure, the parties engaged in any such transaction, conscious as they must be of the comparative depreciation of the National currency, and the consequent enhancement of the prices of the necessaries of life and the cost of living, cannot justly claim the credit of being loyal men or the friends of the people. As we believe in "the eternal fitness of things," we venture to predict that operations such as we have alluded to will finally end in the discomfiture of those who may engage in them. We shall see in a few days the further effects of the benign intentions of Congress in attempting the relief of the importers. A regular daily underselling of the street price of gold by the Treasury will at all events try the rective which will be sufficient without the necessity of further reproof.

We have learned from parties who ought to know, and one extensively engaged in the manufacture of cotton, that there is a larger stock of generally are aware. We have heard the number of bales stated at 40,000, which at \$500 per bale, would be equal to two millions, and this sent to Europe would make a large difference in favor of have suddenly advanced or declined through parour exporters, not only in the amount to be realized but in the profits of exchange. It may be well enough to mention in this place] that several hundred bales of S. American cotton, known scientifically as Gossipium arboreum, have recently been received in this city, and though unginned, brought the shippers upwards of sixty cents per lb. This cotton though of a short fibre is very strong and workable. It is also very abundant in the country of its origin, and still further we may say, that considerable numbers of cotton gins have been sent out to the shippers at their request, so that the article may be more carefully prepared for this market. It is noticeable, says our informant, that there is a reduction in price of many articles of which cotton is a component part, of at least 20 to 25 per cent. from what was demanded a few months since.

We must also remember that with the exception of small quantities of cotton which now and then slip out of Wilmington, the main bulk of this article is now surely and rapidly coming into the Union lines. And many persons are of the opinion that the quantity to come is so large, that it will vet change the balance of trade in our favor. This is certainly a most desirable event, and we hope to be able to have the pleasure of recording the fact.

The Secretary of the Treasury has been expected in New York for some days past, not to negotiate new loans beyond those already announced and become popular, but to consult with our wisest and most disinterested citizens on the financial policy of the Government generally, and to listen to such suggestions as may naturally be offered him.

finance might have been adopted. We are of the

ous banks in this city, now glutted with deposits, on the credit of the nation at home rather than to \$300,580 63, against \$570,685, for the correspond trust to the tender mercies of foreign capital. Evidently the people approve of the policy which has prevailed. There is one unanswerable reply to those objectors who maintain that the money should have been borrowed abroad at any price, and it is this, it would have been utterly impossible to have borrowed sixteen hundred millions of dollars anywhere in Europe. England, the richest of foreign nations could not now on her own account raise any such sum. It has taken her hundreds of years to get trusted for what she now owes, and it is absurd to suppose we could have raised the sums necessary for this war by applications to foreign bankers. What we have to do is to tax heavily, pay our interest in gold regularly, and trust to the industry of the people, and the unexampled resources of the country to bring everything right in the end. We are engaged in a struggle on which hang the hopes of freedom metal of the operators, and perhaps prove a cor- and humanity throughout the world. It is now to be decided whether we are able to govern ourselves, protect ourselves, sustain ourselves, and preserve to future generations the blessings we inherited from our forefathers. The cause is worth all our sacrifices, and finance, as an element of this article on hand in this city than the public power is to be treated as such, and not as the final principle of Government and States.

> The railway share market continues remarkably steady, with several exceptions where the prices ticular causes.

> There can be but one opinion as to the ultimate and fixed value of most of our great lines. Population and production are doing their work silently but surely. Common prudence in selection, is all that is required by those who wish to invest and secure future incomes.

> Money is plentiful but the rates do not fall much below 7 per cent., and will not while so many new and inviting investments are offered to the public. We repeat our previous opinions that coal and other mineral stocks which are actually capable of large production deserve consideration. Especially in coal and iron may money be safely placed, for the consumption of these is largely increasing, and must increase as the country advances in population, manufactures and commerce.

There are some things which may be demonstrated and this is one of them, that the production of fuel and the useful metals must increase with the increase of numbers. Faith in this truth if it could have been exercised thirty or forty years ago, would have made the fortunes of many men, towns and cities, and it is not too late to see the future as it is to be.

Government stocks continue strong, and subscriptions to the new 10-40's are coming in rapidly, tional Bank, 101. More than half a million were received on Tuesday last. They are likely to be as popular as any similar loan yet put upon the market.

The week's exports of domestic produce and miscellaneous goods (exclusive of specie) from this port, have been to the value of \$3,177,025, against \$4,534,075 same week last year, and \$2,-829,060 the corresponding week of 1862.

The total value of imports of foreign goods at It is useless to recur to what other plans of the port of Boston for the week ending March 25,

ing week last year.

The total value of exports from the Port of Baltimore for the week ending March 25th, was \$147.879.

The business of the Sub-Treasury on Tuesday was: receipts, \$3,954,290 17-for customs, 257,-000; payments, \$5,025,259 85; balance, \$32,704,-383 79.

Money was more active during the weeek, and 7 per cent. was readily obtained. Some of the banks complain of a scarcity of plain legal tenders, and have paid over their counters 5 per cent. notes with nearly a month's interest, a fact which proves the scarcity beyond all question.

Several houses in the street hitherto foremost in the gold market, have under the influence of the present Treasury movement withdrawn their attention from that commodity, to other operations more promising.

In addition to our usual tables we give the present week another of a novel and interesting character, showing the condition of all the mining companies that are now known in the market, and we think we may without hesitation assert, that no person can safely invest or deal in any of the securities now affoat, public or private without consulting our tables, prepared with great care and a necessity of the times.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns :-

The Railroad Bank of Lowell pays 5 per cent., April 1: Asiatic, Salem, 3; Ocean Bank, Newburyport, 5; Charles River, Cambridge, 4; Peoples', Roxbury, 4; Warren, South Danvers, 4; Andover, 31/2; Northborough, 31/2; Grand, Marblehead, 4; Merchants', Salem, 31/2; Rockland, Roxbury, 4; Fairhaven, 5; Spickett Falls, Methuen, 4; Hingham, 4; Bristol County, Taunton, 4; Merchants', Newburyport, 4; Quincy Stone, 4; Old Colony, Plymouth, 3; Plymouth, 4; Laighton, Lynn, 81/2; Bank of Brighton, 3; Village Bank, Danvers, 4 per cent.; Haverhill, 3; Lancaster, 4; Brighton Market, 4; Agawam, Springfield, 4; Mechanics', New Bedford, 31/2; Lee, 31/2; Rockport, 4; Cabot, Chicopee, 4; Chicopee Bank, 5; Cambridge City, Cambridgeport, 4; Neponset, Canton, 5; Hadley Falls, Holyoke, 5; Framingham, 5; Abington, 5; Fitchburg, 4; Lowell, 4; Holliston, 31/2; Harvard, Cambridge, 4; Oxford, 4; Southbridge, 4; Bay State, Lawrence, 4; Marblehead, 39-17; Woburn, 5; Bunker Hill, Charlestown, 5; Commercial, Salem, 4; Essex, Haverhill, 3; Union, Haverhill, 3½; Lynn Mechanics', Lynn, 5; Pacfic, Nantucket, 4; Falmouth, 81/2; Provincetown, 4; Holyoke, Northampton, 5.

Proposed Railroad Routes at Lake Superior.
The Houghton Gazette of 11th ult., says there is considerable excitement there over proposed railroad routes, and surveys are now making for three routes—one from Eagle Harbor, to come on the range somewhere near the Madison, by Mr. Webster, one from Copper Harbor, around by Lake Fanny Hoe, and out on the range east of the Star mine, by Mr. Pickel, and another from Lac la Belle, through the south range into the Montreal river valley, opposite Mosquito Lake, by Mr. Green, late of the Portage.

The Treasurer of the Philadelphia and Reading Railroad Company gives notice that the transfer books of the common stock, will be closed on the 31st, March, to be re-opened on the 14th of April, at which time stockholders who have New York certificates are requested to return them to the Farmers' Loan and Trust Company, New York, who will give a receipt for the same, and furnish in a few days thereafter certificates from the Philadelphia office in exchange for said receipts. The transfer office in New York for the preferred stock will be closed permanently on the 31st of March. That for both the preferred and common stock in Boston will be permanently closed on the 31st of March.

The charter of the Milwaukee, Winnebago and St. Paul Railroad Company has been amended so as to remove all obstacles to its organization. The southern part of this route contemplates a line from Richmond, on the La Crosse Road, to Fond du Lac and Oshkosh, by the way of West Bend. The distance from Richmond to Fond du Lac is forty-two miles through a finely settled

Milwaukee, Winnebago and St. Paul R. R.

portion of the State, over a route that affords easy grades, most of which has been already surveyed there are no large streams to cross, and where timber and other materials for construction are convenient. The importance of this road to this city, and to those places named, is very great, and needs only to be appreciated to insure its construction.

Its completion to Fond du Lac alone would

bring back to this city all of the trade of that beautiful section of country of which it is the centre, which has been entirely diverted since the building of the Northwestern Road. It would restore the trade of the Wolf River country, which finds its outlet at Oshkosh, and which has been for several years lost to us. The whole trade tri-butary to Oshkosh and Fond du Lac rightfully belongs to this city, and can be regained by a tithe of the enterprise our neighbors have shown in taking it from us.

The interchange of commodities between those cities and this should not occupy more than a day in transit each way. But such are the difficulties now, that from one to three weeks are consumed in transportation, and all this trade is for that rea-

son sent around to Chicago.

This condition of affairs should not be suffered to continue. The trade of that section which this road should control, is very great, and will soon be so thoroughly settled into its present channel, that we cannot divert it. We hope there is enterprise enough in this large and growing city to se-cure the building of this road, and the business that will come over it-Milwaukee Sentinel.

Railroad Earnings -- Weekly.

The earnings of the Chicago and Northwestern Railway for the week ending March 21, 1864, were .....\$32,404 65 Corresponding week of 1863 ..... 19,978 08

Increase 1864			\$8,732	28

#### Missouri State Bonds.

The following is the law passed by the Legislature of Missouri to provide means for the payment of the bonds of that State that matured in 1862, and 1863:

SECTION 1. The Governor of this State is hereby authorized to issue the bonds of the State of one thousand dollars each, payable in either of the cities of New York or St. Louis, and redeemable at the pleasure of the State, at any time after twenty years, and with coupons attached, bearing interest at the rate of six per centum per annum, payable semi-annually.

SEC. 2. The bonds hereby authorized to be

issued shall not exceed in the aggregate four hundred and two thousand dollars, and shall be signed by the Governor, sealed with the seal of the State and countersigned by the Secretary of State, and registered in the office of the Auditor of Public Accounts.

SEC. 3. The Governor is authorized to negotiate for the exchange of said bonds in renewal of the bonds of the State which matured in 1862, and which shall mature in the year 1863, and all such 

The earnings of the Galena and Chicago Union further authorized to negotiate a sale of said bends through the Bank of the State of Missouri, or other agents, at his discretion, and he shall apply the proceeds therefor to the payment of said State bonds, issued for State purposes, due and to become due in 1863, as aforesaid, which shall not be renewed or extended as hereinbefore provided; and said bonds, when paid, shall be delivered to the Auditor and cancelled by him in his office. Sec. 4. The interest coupons for semi-annual

interest on said bonds shall be paid out of the appropriations for State interest, and the same shall be included in the general appropriation bill for the support of the State government, as heretofore, to pay interest on State bonds issued for State purposes. The faith of the State is hereby pledged for the punctual payment of the interest and principal of the bonds authorized to be issued under this act.

#### The Gold Market.

In compliance with the act of Congress the Secretary of the Treasury has taken the first steps to bring down the price of gold, admitted to have been enhanced by combination rather than the exigencies of commerce. Mr. Cisco the agent of the Treasury in this city has issued the following

United States Treasury, New York, March 28, 1864.

By direction of the Secretary of the Treasury, notice is hereby given that, until further ordered, I will issue to importers, for payment of duties on goods imported by them, certificates of deposit of gold coin, to the credit of the Collector of any port as desired, in exchange for notes, at a quarter of one per centum below the current market value

These certificates are not assignable, but will be received by the Collector from the party to whom J. J. Cisco, they are issued.

Assistant Treasurer of the United States.

He also publishes the following form of the receipt to be given to those importers who have occasion to apply for the coin.

UNITED STATES TREASURY.

. NEW YORK, -I Certify, that -- ha- this day deposited to the credit of the Collector of the port of New - in gold coin. This Certificate is receivable only for duties on imports from the part- to whom it is issued, and upon --- endorsement.

Assistant Treasurer U.S.

These receipts are to be printed on gold colored paper, and are not assignable, nor to be used for any other purpose than the payment of duties. Whatever may be the price demanded in the street the Government will now undersell it.

#### Root River Railroad.

The City Council of La Crosse have resolved to procure fron the Legislature authority to subscribe and pay for stock in the Root River or Southern Minnesota Railroad to the amount of \$50,000; \$100,000 more can be easily raised between La Crosse and Rochester. The road for nearly 25 miles is nearly graded and bridged, so that only about \$300 per mile will have to be expended in order to prepare the line for the rails. The present cash value of the work performed on the line, is not far from a quarter of a million dollars. work already done, and the available subscriptions will amount to over \$400,000. This will supply ample basis for an issue of bonds, with which to purchase the iron and rolling stock for a consideration.

#### Winona and St. Peter Railroad.

The Winona Republican of the 23d ult., says that work on the road west of St. Charles is being carried on as rapidly as circumstances will admit, and strong hopes are entertained that the line will be in running order to Rochester sometime in July next. The requisite quantity of iron for laying the track to that point has been purchased in New York and paid for, and will be delivered in Winona soon after the opening of navigation. When the cars reach Rochester, the company will begin to realize something from their immense outlay but scarcely before, notwithstanding a brisk traffic has already been inaugurated. Meantime the region of country through which the road runs, and in fact all that portion of the State from Winona west as far as Mankato and St. Peter, will be greatly benefitted even by the extension of the line to its present western terminus.

#### Interest and Dividends.

The Chicago and Rock Island Railroad Company have declared a semi-annual dividend of three per cent (and the United States Government Tax on the same) payable at the office of the Company, in the City of New York, on and after the 11th day of April.

The semi-annual interest, due April 1, on the first mortgage preferred bonds of the St. Louis, Jacksonville and Chicago Railroad Company will be paid at the office of Messrs. M. K. Jesup & Co., No. 59 Exchange-place, New York.

The coupons of the New Land Bonds of the Hannibal and St. Joseph Railroad Company, due April 1, will be paid on presentation at the office of Duncan, Sherman & Co.

The coupons of the first mortgage bonds of the St. Louis, Alton and Terre Haute Railroad Company, Series B, due on the 1st April, 1864, will be paid on presentation at the Bank of North

The Panama Railroad Company will pay 5th of April a quarterly dividend of 4 per cent. from the the bill granting power to the Milwaukee and earnings of the road, and one percent. from those of the steamers.

Railway due on the 1st of April will be paid at the bridge is now in a fair way of construction, the office of McAndrew & Wann, No. 12 Pine st.

pay April 1, at the Bank of America, a dividend Milwaukee, will be in running connection with of 5 per cent., free of tax.

The Chicago and Great Eastern Railway Company will pay, 1st April, the coupons of the first mortgage bonds at the office of Schuchardt & Gebhard 21 Nassau street.

The coupons of the income bonds of the Chicago and Alton Railroad Company, due 1st of April, will be paid at the office of G. S. Robbins & Son, No. 54 William street, New York.

The Cleveland and Toledo Railroad Company, have declared a semi-annual dividend of four per cent, free of Government Tax, payable on the 23d day of April, at the office of Messrs. Vermilye & Co., No. 44 Wall street, New York City, and until the 21st day of May, and after the latter date at the Company's office in Cleveland.

The Hartford and New Haven Railroad Company have declared a quarterly dividend of \$3 free of Government tax, payable April 1, at the Union Bank, New York.

The interest on the mortgage bonds of the New York and New Haven Rallroad Company, due April 1, will be paid at the Bank of the Republic. Western, 9; Worcester and Nashua, 6.

The Philadelphia, Wilmington and Baltimore Railroad Company have declared a semi-annual dividend of five per cent, payable on the 1st of April, clear of the usual Government tax.

The Philadelphia, Germantown and Norristown Railroad Company have declared a semi-annual dividend of four per cent, clear of all taxes, payable on the 1st of April.

The Champlain and St. Lawrence Railway Company have declared a semi-annual dividend of five per cent., on the new preferred stock of the company payable April 1.

The Georges Creek Coal and Iron Company have declared a dividend of three per cent, payable April 4.

The Franklin Coal Company has declared a nonthly dividend of \$3 per share, payable April 6.

The Lowell and Lawrence Railroad have declared a dividend of \$3 per share.

#### Cornwall Copper Mining Company.

This mine is located near the thriving village of Strafford, in the State of Vermont, in the immediate vicinity of the well known Corinth, Vershire, Copperas Hill and Green Mountain Mines, and upon the same veins of those mines, all of which have been successfully worked. The Company own seventy acres of mining land, with a large dwelling house and other buildings thereon. The Mine is located upon elevated land, affording an excellent drainage, and should it be deemed advisable an adit could be driven into the vein at a low level. There is also a fine stream of water running through the property, giving a sufficient supply of water at all times, for mining purposes; and the neighborhood is thickly settled, and an abundance of labor can be obtained at a low rate. The smelting furnace of the Copperas Hill Mine is only threefourths of a mile distant, where the ores could be dressed at low rates. Being upon the same vein with, it is not too much to predict for this mine a success equal to the mines above mentioned.— Boston Post.

#### Bridging the Mississippi River.

We learn from the Milwaukee Wisconsin, that Prairie du Chien Railway, to bridge the Mississippi River, has finally passed the Legislature. The coupons of the Atlantic and Great Western bill had already passed the Iowa Legislature; so as well as the much needed Southern Wisconsin The Cincinnati, Hamilton and Dayton road will Railroad. By the bridge to be build at Dubuque, the whole system of railroads of Northern Iowa.

#### Massachusetts Railroads.

The following statement of the condition of the steam railroads of Massachusetts and their operations in 1863, is gathered from the last annual re

Capital stock	869,362,052
Capital paid in	57,546,568
Cost of roads and equipment	66,809,802
Total length of miles in main roads and	
branches, (single and double tracks)	1,941
Total income in 1863	11,950,739
Working expenses	6,571,06
Net earnings	5,379,673
Interest paid	
Among the dividends declared for	

Among the dividends declared for the following: Boston and Lowell, 7 per cent; Maine, 8; Providence, 8; Worcester, 9; Connecticut River, 6; Eastern, 6; Fitchburg, 6; Fitchburg and Worcester, 6; Nashua and Lowell, 8; New Bedford and Taunton, 6; Norwich and Worcester, 51/2; Old Colony and Newport, 6; Providence and Worcester, 8; Taunton Branch, 8;

#### The Gold Bill.

The following is an official copy of the resolution authorizing the Secretary of the Treasury to dispose of the surplus gold:

Resolved, That the Secretary of the Treasury be authorized to anticipate the payment of interest on the public debt by a period not exceeding one year from time to time, either with or without a rebate of interest upon the coupons as to him may seem expedient, and he is hereby authorized to dispose of any gold in the Treasury of the United States not necessary for the payment of interest of the public debt.

Provided, That the obligation to create a Sinking Fund by the act of February 25th, 1862, shall not be impaired thereby.

The act alluded to provides that the duties on imports shall be paid in coin or old demand notes; and the coin so paid shall be set apart as a special fund (1) to the payment of interest in coin on the bonds and notes of the United States; (2) to the purchase or payment of one per centum of the entire debt of the United States to be made within each fiscal year after the 1st day of July, 1862, which is to be set apart as a sinking fund; and (3) the residue thereof to be paid into the Treasury of the United States.

#### The Albany and Boston Railroad.

A bill has been pending before the Legislature to secure the relaying of the track between Waterford Junction and Eagle Bridge, with a favorable prospect of its passage. The opponents of the measure, however, have effected an agreement an agreement which, if carried out, will induce the friends of the bill to withdraw it, and further movements to secure its passage will be suspended for the present, to afford an opportunity to carry out the new proposition. The Troy and Boston, the Rutland Burlington, the Cheshire, the Fitchburg, Rutland and Washington, and the Albany and Boston Railroads, will enter into an agreement whereby a continuous and through connection shall connection and through connection shall be secured from Albany to Boston over those roads. For this purpose, a track will be laid from the track of the Northern road, in West Troy, over the bridge into the depot of Troy. If this project shall be consumated, and trains run from Boston into this city without change of cars, over the roads named, the friends of the measure now pending in the Legislature will, it is said, be satisfied. Albany Evening Journal.

#### Steel Boilers.

Some interesting experiments have been made in Prussia with steel steam boilers, an account of which has been published in Dingler's Polytechnic Journal. A steel boiler of the egg-end shape, four feet in diameter and thirty feet in length, without flues, was tried. It had a steam drum two feet in the diameter and two feet in hight, and the plates were one-fourth of an inch in thickness. Beside it there was placed another boiler, similar in every respect, excepting that the plates were of iron 0,414 of an inch in thickness. The steam boiler was tested by hydraulic pressure up to 195 pounds on the inch, without leakage, and both the iron and steel boilers were worked under a pressure of 65 pounds on the inch for about one year a half. During this period the steel boiler generated twenty-five per cent. more steam than the iron one, and when they were thoroughly examined after eighteen months' practical working, there was less scale in the steel than in the iron boiler. The former evaporates 11.66 cubic feet of water per hour; the iron boiler 9.37 cubic feet. The quantity of coal consumed was on an average 2,706 pounds for the steel one in twelve hours, and 2,972 pounds for the tron boiler. The plates of the steel boiler over the fire were uninjured, while those el boiler over the fire were uninjure of the iron one were worn out. In Prussia several

worn out plates of iron boilers have lately been replaced with steel, which, it is stated, lasts four times as long. As steel is twice as strong as iron, thinner plates of the former may be employed for boilers, and more perfect riveting can be secured. A greater quantity of steam can also be generated in the steel boiler on account of its thin plates, and thus much fuel may be economized. Such steam boilers should engage the attention of all who make and use steam boilers for engineering and manufacturing purpose.

#### Platt County Railroad.

The Missouri Democrat of the 11th ult., says that the Platte County Railroad "is attracting much attention now. Since it has been advertised for sale, parties have begun to inquire into its value. Its net receipts last year are said to be over \$100,000, and its passenger receipts alone for February last, were \$6,900. As the minimum price of the road is \$826,000, its value as an investment is operating on our capitalists, and you need not be surprised if a company of St. Joseph men become the purchasers. The road is to be sold for cash, but the coupons on the bonds issued to it by the State are to be received as cash. Agents are in New York negotiating for the conpons. The bondholders are ignorant of the value of the road, and will no doubt eagerly embrace the opportunity of converting their coupons into cash at almost any figures. It is to be hoped our Western men may for once steal a march on their sharp Eastern brethern."

#### Minnesota Railroad Matters.

The La Crosse Republican, in speaking of Minnesota railroad matters, as bearing upon La Crosse,

Mr. Chamberlain intends to build the Minnesota Central (formerly known as the Cedar Valley Railroad) as far south as the Iowa and Minnesota State line, to a point that is nearly one hundred miles west from La Crosse, there to connect with a line extending down through Iowa. The Minnesota Central intersects the Winona and St. Peter Railroad, at Owatonna, about the same distance weat from the Mississippi.

Unless La Crosse secures the early construction of a more direct road, via Root River, to some point on the Winona and St. Peter Railway, the Milwaukee and St. Paul Railroad Company, and the Minnesota Central Railway Company, both of which are owned by the same capitalists, will supply the intermediate link to complete a continuous railway connection via Winona.

The Lehigh Coal and Navigation Company have determined to issue a new mortgage loan, having twenty years to run, from the first of April, 1864, at 6 per cent. per annum, payable quarterly, for which the holders of the existing loan will be permitted to exchange at par, provided notice of their intention to do so is given before the 19th of April, 1864. The exchange of the old or existing bonds, which have six years to run, for the proposed new bonds, having twenty years to run, is entirely optional with holders of the existing

#### Dansville and Genesse Valley Railroad.

The following gentleman have been selected as directors of this company: George Hyland, James Faulkner, Chas. Shepard, James C. Jackson, Jesse Angell, Hugh McCartney, Sidney Sweet, Alonzo Bradner and Orville Tousey, Dansville; Hugh T. McNair, West Sparta; Anson D. Smith, Mt. Morris; Isaac Butts and William Kidd, Rochester.

The road, when constructed, will be 15 miles in length, extending from Dansville to Mt. Morris. The amount of capital stock is \$150,000.

#### Extensive Coal Depot.

We understand that proposals have been made by agents authorized by the New York Central Railroad Company, for the purchase of the premises at Niagara, formerly known as the Car Factories and grounds. The ostensible design is to construct there a mammoth coal yard for the supply of Western Canada. The road is soon to be completed to Fort Erie, by the assistance of the New York Central, and the coal is to be transported from the American side to Fort Erie, and thence to Niagara. The intention is to have no change of cars, as the coal cars will be ferried across the river at Fort Erie.—St. Catharines (Canada) Journal.

#### Marietta and Cincinnati Railroad.

The engineer has completed the surveys for the bridge over the Ohio River from Belpre to Parkersburgh, and is now engaged on the plan and drawing. It is expected that the work on this important structure will be commenced this Spring.

#### Copake Iron Mines.

The Copake Iron Company, whose mines are situated in Columbia Co., N. Y., expect during the Spring to mine and forward two or three hundred tons of iron ore daily. Mr. D. B. Martin recently an engineer in the employ of the Erie Railroad Company, has been engaged as Superintendent. The demand for this ore is sufficient to warrant the yearly production of one hundred thousand tons. On the 17th, a large meeting was held at Poughkeepsie, to take measures to build a railroad from the latter place to Copake.

A company has been formed in France to supply steamers for the navigation of its canals. Sixteen vessels of 16 horse power are being constructed by it at Argentuil. Three of the same description are already at work, and are said to be profitable.

A meeting of the first and second mortgage bondholders of the Pittsburg, Fort Wayne and Chicago road has been called by Winslow Lanier & Co., of New York, for the 7th of April, in pursuance of the provisions of the deeds of trust, for the purpose of considering certain modifications of the present financial system of the Company, to which the consent of a majority in interest of each of these classes of bondholders, by a vote at a meeting, is necessary. The principle of the proposed measures was submitted to the annual meeting of the corporation held at Pittsburg on the 16th ult., at which were represented a majority of the stockholders, and of each class of the bondholders, and was unanimously approved.

Gen. McCallum, Inspector of Railroads, has taken possession, in the name of the United. States, of all the unfinished locomotives of the Portland Company's works. They were being constructed for the Grand Trunk Railway.

#### Fulton Coal Co.

We have several communications in respect to this company, in reply to which we say, that the original corporation was "The Northumberland Improvement Company," with a capital of \$300,-000, dividend into shares of \$50 each, and organized in 1854, on 4000 acres of land. In 1857 the capital stock was reduced from \$50 to \$10 per share. In 1859, by virtue of act of Assembly, the shares were again reduced to \$5 each, thereby saving in tax on capital. The name was at the same time changed to "The Fulton Coal Company." The company now own about 1856 acres of land, nearly the whole of which the report of geologists and engineers say is underlaid with very large amounts of white and gray ash anthracite coal. Whether any portion of the lands referred to have been sold we cannot say. The same report states that five of the veins can be worked above water level. The Philadelphia and Sunbury Railroad runs through the lands. The Company is represented as not only clear of deby but owns 3000 shares of its own stock, equal, at Saturday's prices, to about \$52,500.—Phila. Ledger.

#### Lake Ontario and Hudson River Railroad.

The project of a railroad penetrating the wilderness of Northern New York, which has successively been known as the Sacketts Harbor and Saratoga, and Lake Ontario and Hudson River Railroad, and more recently as the Adirondac Company, now exhibits signs of vitality which promise a speedy and successful issue. New surveys of the route are nearly completed, and we are assured that preparations are in progress to put the work in hand with the least possible delay. The Eastern terminus of the road—which will be either at Saratoga Springs or Ballston Spa—is now the most important question remaining unsettled, and it is one of no little interest to the company and to the people of this vicinity.

The natural terminus of the road is Albany, and here is where it will terminate. The road should, we trust will, be speedily completed. The Saratoga meeting adopted the following:

Resolved, That in order to facilitate this location, a committee, to consist of Augustus Bockes, J, M. Davison, John Denton, H. H. Hathorn and W. J. Hendrick, be appointed to negotiate with the land owners in the towns of Greenfield and Saratoga Springs, along the several routes pointing to this village, and to secure the right of way, conditionally, upon the most favorable terms—Saritogian.

The first locomotive engine was landed last month at Ceylon from the ship Palmerston. It was sent ashore on a bamboo raft, and was to be drawn to the railway station by a team of three elephants.

General Superintendent of the Pittsburgh, Fort Wayne and Chicago Railroad, and Cleveland and Pittsburgh Railroad still retains the Presidency of the latter road; the Vice-President, James F. Clark, discharging the duties of President in his absence.

T. B. Blackstone, Esq., has been made President of the Chicago and Alton Road, in place of Hon. James Robb, resigned.

Robt. Hale, Esq., late President of the Vermont and Massachusetts Railroad, takes the position of General Superintendent of the Chicago and Alton Railroad.

E. A. Chapin, Superintendent of the Rutland and Burlington Railroad has resigned his position for that of Superintendent of the New York and Harlem Railroad, upon which he enters the 1st of April, Ohio and Mississippi Railroad.

We learn from the Cincinnati Gazette that the Ohio and Mississippi Railroad Company have "purchased transfer grounds at Storr's, threefourths of a mile in length, embracing all the land south of the canal and west of Mill Creek, with an unimportant exception. It is above high water, and arranged for five miles of side tracks, intended for the storage of cars of the Atlantic and Great Western, the Cincinnati, Hamilton and Dayton, the Ohio and Mississippi, and such other roads as may desire to use them. The Ohio and Mississippi Railroad Company have recently removed the buildings on these grounds, and are now erecting a warehouse 800 feet in length by 65 feet in width with two tracks running through it, and two adja cent, all of which are arranged for the wide and narrow gauges. Four of the longest freight trains can occupy the building at the same time, and transfer their freight to each other. Trains on the inside tracks can be housed in perfect safety if necessary. The Ohio and Mississippi Railroad Company have shown a wise foresight in securing such an eligible location for the purpose, and are pursuing to completion, with commendable energy, the necessary buildings for the accommodation of the immense transfer business now done at this point."

### RAILROAD IRON.

2,500 TONS RAILROAD IRON, 50 lbs. per yard.

### NAYLOR, VICKERS & CO., SHEFFIELD, ENGLAND.

CAST STEEL TYRES WITHOUT WELD,

Reversible Crossings and Frogs, Disc Wheels, Pistons and Piston Rods without weld, Crank and Straight

AXLES, AND EVERY DESCRIPTION OF STEEL FOR RAILWAY PURPOSES.

TEEL CROSSINGS have been in use more than three years with very little perceptible wear, in places where the ordinary ones had to be replaced every four months. They have been estimated to be good for ten years in the worst places.

THE "VICKERS" TYRES are in constant and extensive use on almost all the Railways in Great Britain, and also on many roads in other parts of Europe. Their week through they will outlast any Iron Tyre without being turned, and for this reason are cheaper than Iron Tyres (tree of cost). 2. Their Safety: being without a weld they are not liable to break, and steel is proved to be a stronger and tougher without a weld they are not liable to break, and steel is proved to be a stronger and tougher metal than any other. 3. Their Uniformity they do not wear in flat places nor "jaminate," and will consume much less on; nor are they sable to granulate from constant use.

For CIRCULARS, GIVING FULL PARTICULARS AND TESTIMONIALS, PRICES, etc., apply to NAYLOR & CO.,

421 Commerce street, Philadelphia; 99 John street, New York; 80 State street, Hoston.
